Subjects

(E) denotes editorial,
(L) letter to the Editor,
(R) conference or exhibition report

Air track, Mechanical resonance on an 47, 205(L)
Ampere, Definition of 107(L), 154(L)
Apparatus, Physics 108(L), 258(L)
Applied physics course 160
ASE manufacturers' exhibition 108(L), 134(R),
258(L)
Association for Astronomy Education 203(R)
Astronomy 4(L), 203(R)
Attitudes to physics, Pupils' 103, 105(L)
Authoritarianism, Science education and 257(L)

Bohr theory, Teaching 86

Careers with physics 7, 136, 206(L)
Character recognition using a pin-hole type
camera 270
Colour of the noble metals 280
Combined degrees, Students' views of physics
in 185
Computer simulation of a particle in a
one-dimensional double or triple potential
well 27
Computer simulation of diffraction patterns 294
Computer simulation of motion on a rotating
surface 109(L)
Computer, Teaching oscillations with a small 172
Conceptions of ideas in physics, Students' 149(E),
155, 213, 253(R)
Convection, An experiment on cooling by 43
Cosmic jets 169
Courses, Design of physics 31
Critical point, Light scattering near the 49
Crystal growth display 85
Curve plotting experiment, Equipotential 272
Curve squarer for teaching optics and electronics,
A visual 176

Design publication 54
Diffraction fringes at a straight edge 90, 207(L)
Diffraction patterns, Computer simulation of 294
Diffraction, A test of relativity by electron 174
Diffraction, Single-slit 85

Earthquakes, Detecting 35, 64, 154(L)

Electrical systems, Mechanical analogues of 180
Electronics AO syllabus, JMB 14, 153(L)
Electronics syllabuses 149, 201
Electronics, Modern 20, 266
Electroscope to electrometer, From 39
Emission and absorption spectra 85
Energy from village to nation 71
Energy, Some alternative views of 213
Energy, Teaching about 55(L), 106(L),
204-5(L), 209, 259(L)
Engineering solutions to the A-level physics
problem 31
Equipotential curve plotting experiment 272
Errors and uncertainty in physical
measurement 290
Exercises, investigations and experiences 60
Experiments, Physics 3(L), 47, 125, 205(L)

Feeling physics 105(L)
Fluid medium, Motion of a sphere in a 48
Formula in physics, The two components of a 277
Fraunhofer 93, 140
Fresnel diffraction 90, 207(L)

Girls and physics 151, 225

Heating and energy 106(L), 258(L)
Historical case studies 93, 140
History of meteorology and oceanography
group 255
History of the sixth-form physics textbook 192,
240
Holography with optical fibres 44

Industry-education links 253(E)
Interference effects, Thin-film 84

Langmuir-Blodgett films 266
Language and physics 149(E), 155, 253(R)
Laser tube life 4(L)
Laser, School 5(L)
Lasers, Salvaging 56(L)
Liquid crystal devices 20
Lissajous' figures 108(L), 109(L)

Magnetic domains 46
Masers and NMR, Permanent magnets help
model 82
Mechanical analogues of electrical systems 180
Mechanical resonance on an air track 47, 205(L)
Medical physics, A career in 136
Meteorology and oceanography group, History
of 255

- Metrication 5(L)
 Micro, Which? 57
 Microcomputer interface for external circuit control, A 284
 Microcomputer measurement of velocity of sound 128
 Microcomputers, A modular system of interfacing 262
 Micros in physics education 152(R)
 Micros in schools awareness pack 54
 Microscope, Measurement of the resolution of the optical 178
 Mirages with an astronomical telescope, Investigating 80
 Motion of a sphere in a fluid medium 48

 NISTRO-TECH 103
 NMR, permanent magnets help model masers and 82
 Nuclear arms 117, 122, 124, 208(L), 230, 255(L)
 Nuclear power 151(R)

 Olympiad, Physics 203, 254(R)
 Optical fibres, Holography with 44
 Optical properties of noble metals 280
 Oscillation of non-Hookean springs 217
 Oscillations of a pendulum 271
 Oscillations with a small computer, Teaching 172
 Oscillations, teaching damped and forced 275

 Peace education 122, 124, 230
 Pendulum, Period of 271
 Phase shifting circuit, A simple 108(L)
 'Phenomena laboratory' for physics students 125
 Physics Plus Project 221
 Physics, What is 7, 206(L)
 Pin-hole type camera, Character recognition using a 270
 Potential well, Computer simulation of a particle in a one-dimensional double or triple 27
 Practical work 1(E), 60, 125
 Printing with Lasergravure 247
 Projectile theory 48

 Quantum theory 27, 86

 Reactance, Teaching of inductive and capacitive 180
 Refraction 93, 140
 Refractive index 56(L), 80
 Relativity 169
 Relativity by electron diffraction, A test of 174
 Research in schools 55
 Resolution of the optical microscope, Measurement of 178
 Resources list on nuclear weapons 230
 Rotating frame, Motion in a 256(L)
 Rotating surface, Computer simulation of motion on 109(L)
 Rotating turntable, A rolling sphere on a tilted 234

 Scattering near the critical point, Light 49
Science Education 11-18 150
 SISCON course 102
 Sixteen plus examinations 201(E)
 SNIPPETS 54
 Social responsibility 101(E), 102, 110, 114, 117, 122, 124, 208(L), 225(L)
 Solar energy in schools and colleges 104(R)
 Sound, Microcomputer measurement of velocity of 128
 South West Physics Centre 2(R)
 Springs, Measurements of some properties of non-Hookean 217
 Stamps, Physics on 68
 Statistics of physics students 104, 151
 Submarine, Physics on a 166

 Teacher training 53(E)
 Television physics demonstrations 84
 Temperature scales 3(L)
 Textbook, History of sixth-form physics 192, 240
 Thermodynamics, Experiment on cooling 43
 Thermodynamics, Zeroth law of 3(L)

 Units 5(L), 107(L), 154(L)
 Units, Definitions of quantities and 259

 Waveform squaring, Visualising 176
 Women in Technology scheme 203

Authors with titles

(E) denotes editorial,
(L) letter to the Editor,
(R) conference or exhibition report

- Akrill T: Detecting earthquakes 154(L)
Akrill T: JMB electronics 153(L)
Akrill T B: Metrication 5–6(L)
Akrill T: Physics apparatus 108(L)
Archenhold W F: Physics—words and concepts 149(E)
Armstrong H L: An experiment on cooling by convection 43–4
Atwood B G: Links 253(E)
- Bailey D E and Logan P F: Physics in the city 160–5
Bates P A: Microcomputer measurement of the velocity of sound in air 128–33
Bausor J: The new physics—who says so? 201(E)
Beard D: Physics experiments 3(L)
Bianchetti G B and Ganci S: Holography with optical fibres 44–7
Blasiak W: Errors and uncertainty in physical measurement 290–4
Blin-Stoyle R: Girls and physics 225–8
Boving R, Hellemans J and De Wilde R: Teaching damped and forced oscillations in the student laboratory 275–6(N)
Bowlit C: Measurement of the resolution of the optical microscope 178–9
Bradshaw M J: Liquid crystal devices 20–6
Brojan J B: Teaching about energy 204–5(L)
Brown L M: A test of relativity by electron diffraction 174–6
Burge E J: Physics on stamps: Appendix XIII 68–70
- Calvo J L, Pena J J and Perez A L: Teaching oscillations with a small computer 172–4
Chambers R G: Definition of the ampere 107–8(L)
Crofts C: Feeling physics 105–6(L)
- Daniel M F and Smith G W: Langmuir–Blodgett films 266–9
Davies G R: Some colourful television physics demonstrations 84–5
Dearden J: Astronomy and school physics 4(L)
Deeson E: Practical matters 1(E)
De Wilde R: see Boving R
Dodd N A: Computer simulation of diffraction patterns 294–9
Dorey A P: Engineering solutions to the A-level physics problem 31–4
Duncan A J: Mechanical resonance 205–6(L)
Duxbury J: Teaching about energy 204(L)
- Elwell M J: School laser 5(L)
- Fendley J: Refractive index 56(L)
Floor C: Investigating mirages with an astronomical telescope 80–2
- Ganci S: see Bianchetti G B
Geake J E: A visual curve squarer for teaching optics and electronics 176–8
Gee B: Through a hole in the window-shutter 93–7, 140–9
Gorham D A: A microcomputer interface for external circuit control 284–9
Gough C E: The JMB physics electronics AO syllabus 14–7, 153–4(L)
Gough W: A simple phase shifting circuit 108(L)
- Harley C R: He–Ne laser tube life 5(L)
Heath N E: Definition of the ampere 154(L)
Heath N E: Energy and heating 106–7(L)
Heath N E: Heating and working man's club 258(L)
Hellemans J: see Boving R
Helsdon R M: Cosmic jets 169–70
Herreman W: Some physics demonstration experiments 47–9, 206(L)
Houlden M A, Jackson J N and Thomas M F: A 'phenomena laboratory' for physics students 125–7
Hoyland J: see Isenberg C
Hubert G: Students' views of physics in combined degrees 185–91
Humberston J W, McKenzie J and McTiernan P G: Computer simulation in a one-dimensional double or triple potential well 27–31
- Isaacson P: ... or a torch lighting the way to the future? (Peace education) 124
Isenberg C: Detecting earthquakes—part 1 35–8, 42, 154(L)
Isenberg C, Miasik J, Mesure S and Hoyland J: Detecting earthquakes—part 2 64–7
Isenberg C: Micros in physics education 152–3(R)
Isenberg C: Solar energy in schools and colleges 104(R)
- Jackson J N: see Houlden M A
Jarvis W H: Physics apparatus 258(L)
Jarvis W H: Physics underwater 166–8
Jarvis W H: Salvaging lasers 56(L)
Jarvis W H: Which micro? 57–60

- Jeffrey W S: see MacInnes I
- Jones W: The possibility of a scale of temperature 3–4(L)
- Kington B and Saville S: Reflections on a conference 253–4(R)
- Lancaster G: Measurements of some properties of non-Hookean springs 217–20
- Lang S R: see Sambles J R
- Latimer C J: Teaching Bohr theory 86–90
- Lijnse P: Is that what physicists really do? 206–7(L)
- Logan P F: Energy from village to nation 71–7
- Logan P F: see Bailey D E
- McClelland G: The limits to a physics teacher's responsibility 114–6
- Mace W K: Definition of the ampere 107(L)
- MacInnes I and Jeffrey W S: Teaching of inductive and capacitive reactance 180–4
- McKenzie J: see Humberston J W
- McKim F R: The Physics Plus Project 221–4
- McTiernan P G: see Humberston J W
- Madrid A C: The period of a pendulum 271–2(N)
- Martin P: A modular system of interfacing microcomputers 262–5
- Marx G: What is physics? 7–13
- Masson A J, Tollin P and Wilson H R: Character recognition using a pin-hole type camera 270–1(N)
- Mesure S: see Isenberg C
- Miasik J: see Isenberg C
- Michaelis M M: Permanent magnets help model masers and NMR 82–4
- Morton N: Diffraction at a straight edge 207–8(L)
- Newton D P: The sixth-form physics textbook 1870–1980 192–8, 240–6
- Nicholl B: Metrication 5(L)
- Ong P P: An equipotential curve plotting experiment suitable for mass duplication 272–5(N)
- Pena J J: see Calvo J L
- Perez A L: see Calvo J L
- Podmore F: He–Ne laser tube life 4–5(L)
- Poole R T: The colour of the noble metals 280–3
- Preist T W: see Sambles J R
- Richmond P E: Teaching about energy 55–6(L)
- Ridley D: Definition of the ampere 107(L), 154(L)
- Riggi F: Two-dimensional motion in a rotating coordinate system 109
- Riveiro J M: Magnetic domains 46
- Sambles J R, Preist T W, Land S R and Toms R P: A rolling sphere on a tilted rotating turntable 234–9
- Saville S: see Kington B
- Seymour P: Astronomy and school physics 4(L)
- Shimizu S: Social responsibility 256(L)
- Shimizu S: The message of Hiroshima—recollections and reflections of a nuclear physicist 117–21
- Siddons J C: From electroscope to electrometer 39–42
- Smallwood R A: Physics apparatus 108–9(L)
- Smith G W: see Daniel M F
- Smith M: Printing with Lasergravure 246–9
- Solomon J: Is physics easy? 155–60
- Solomon J: Teaching about energy 205(L)
- Spurgin C B: Definitions of quantities and units 259–62
- Spurgin C B: Social responsibility 208(L)
- Stonier T: Teaching physics is not enough 101–2(E)
- Sullivan R A L: No quarter asked, but given! 90–2
- Summers M K: ASE manufacturers' exhibition 134–5(R)
- Tebbutt M J: The age of the train? 53(E)
- Thomas M F: see Houlden M A
- Tollin P: see Masson A J
- Toms R P: see Sambles J R
- Tsuma O G K: The two components of a formula in physics 277–9
- Warren J W: Energy and its carriers: a critical analysis 209–12
- Warren J W: Science education and authoritarianism 257–8(L)
- Warren J W: Teaching about energy 55(L)
- Watkins T L: Refractive index 56(L)
- Watts D M: Some alternative views of energy 213–7
- Wellington J J: Science and peace education—big bang or damp squib? 122–3
- Wellington J J: Teaching the unteachable—a list of resources 230–3
- Wells P N T: A career in medical physics 136–9
- Whiting J S S: Motion in a central-force field 256–7(L)
- Williams W F: The responsibility of scientists 110–4

Contents of volume 18

January 1983

- Editorial: Practical matters: ERIC DEESON 1
What is physics?: GEORGE MARX 7
The JMB electronics AO syllabus: C E GOUGH 14
Liquid crystal devices: MADELINE J BRADSHAW 20
Computer simulation of a particle in a one-dimensional double or triple potential well: J W HUMBERSTON, J MCKENZIE and P G McTIERNAN 27
Engineering solutions to the A-level physics problem: A P DOREY 31
Detecting earthquakes—part 1 CYRIL ISENBERG 35
From electroscope to electrometer: J C SIDDONS 39
Notes on experiments: An experiment on cooling by convection: H L ARMSTRONG; Holography with optical fibres: G B BIANCHETTI and S GANCI; Magnetic domains: J M RIVEIRO; Some physics demonstration experiments: W HERREMAN 43
News and comment 1, Letters 3, Queries in physics 6, Physics apparatus 17, Have you read this? 18, Film reviews 49, Book reviews 50, Forthcoming conferences and courses 52

March 1983

- March leader: The age of the train?: M J TEBBUTT 53
Which micro?: W H JARVIS 57
Exercises, investigations and experiences: BRIAN E WOOLNOUGH 60
Detecting earthquakes—part 2: C ISENBERG, J MIASIK, S MESURE and J HOYLAND 64
Physics on stamps: Appendix XIII: E J BURGE 68

- Energy from village to nation: PETER F LOGAN 71
Notes on experiments: Investigating mirages with an astronomical telescope: C FLOOR; Permanent magnets help model masers and NMR: M M MICHAELIS; Some colourful television physics demonstrations: G R DAVIES 80
Teaching Bohr theory: C J LATIMER 86
No quarter asked but given!: R A L SULLIVAN 90
Through a hole in the windowshutter—part 1: BRIAN GEE 93
News and comment 54, Letters 55, Queries in physics 77, Have you read this? 78, Film reviews 97, Book reviews 98, Forthcoming conferences and courses 100

April 1983: supplement

- Physics courses supplement
Introduction 1
Courses index 3
Courses in physics in England, Wales and Northern Ireland 5
Courses in physics in Scotland 53
Institution index 59

May 1983

- May leader: Teaching physics is not enough: TOM STONIER 101
The responsibility of scientists: W F WILLIAMS 110
The limits to a physics teacher's responsibility: G McCLELLAND 114
The message of Hiroshima—recollections and reflections of a nuclear physicist: SAKAE SHIMIZU 117

Science and peace education—big bang or damp squib?: J WELLINGTON 122
 ... or a torch lighting the way to the future?: P ISAACSON 124
 A 'phenomena laboratory' for physics students: M A HOULDEN, J N JACKSON and M F THOMAS 125
 Microcomputer measurement of the velocity of sound in air: P A BATES 128
 A career in medical physics: P N T WELLS 136
 Through a hole in the window shutter—part 2: BRIAN GEE 140
 News and comment 102, Letters 105, Queries in physics 109, Physics apparatus 134, Have you read this? 144, Software reviews 145, Book reviews 147, Forthcoming conferences and courses 148

July 1983

July leader: Physics—words and concepts: W F ARCHENHOLD 149
 Is physics easy?: JOAN SOLOMON 155
 Physics in the city: D E BAILEY and P F LOGAN 160
 Physics underwater: W H JARVIS 166
 Cosmic jets: R M HELSDON 169
 Notes on experiments: Teaching oscillations with a small computer: J L CALVO, J J PENA and A L PEREZ; A test of relativity by electron diffraction: L M BROWN; A visual curve squarer for teaching optics and electronics: J E GEAKE; Measurement of the resolution of the optical microscope: C BOWLT 172
 Teaching of inductive and capacitive reactance: I MACINNES and W S JEFFREY 180
 Students' views of physics in combined degrees: GORDON HUBERT 185
 The sixth-form physics textbook 1870–1980—part 1: D P NEWTON 192
 News and comment 149, Letters 153, Queries in physics 160, Have you read this? 170, Book reviews 198, Software reviews 200

September 1983

September leader: The new physics—who says so?: JOHN BAUSOR 201
 Energy and its carriers: a critical analysis: J W

WARREN 209
 Some alternative views of energy: D MICHAEL WATTS 213
 Measurements of some properties of non-Hookean springs: G LANCASTER 217
 The Physics Plus Project: F R MCKIM 221
 Girls and physics: ROGER BLIN-STOYLE 225
 Teaching the unteachable—a list of resources: J J WELLINGTON 230
 A rolling sphere on a tilted rotating turntable: J R SAMBLES, T W PRIEST, S R LANG and R P TOMS 234
 The sixth-form physics textbook 1870–1980—part 2: D P NEWTON 240
 Printing with Lasergraving: MARTIN SMITH 246
 News and comment 201, Letters 204, Have you read this? 228, Queries in physics 233, Film reviews 249, Book reviews 250

November 1983

November leader: Links: B G ATWOOD 253
 Definitions of quantities and units: C B SPURGIN 259
 A modular system of interfacing microcomputers: PETER MARTIN 262
 Langmuir–Blodgett films: M F DANIEL and G W SMITH 266
 Notes on experiments: Character recognition using a pin-hole type camera: A J MASSON, P TOLLIN and H R WILSON; The period of a pendulum: A CERVANTES MADRID; An equipotential curve plotting experiment suitable for mass duplication: P P ONG; Teaching damped and forced oscillations in the student laboratory: R BOVING, J HELLEMANS and R DE WILDE 270
 The two components of a formula in physics: O G K TSUMA 277
 The colour of the noble metals: R T POOLE 280
 A microcomputer interface for external circuit control: D A GORHAM 284
 Errors and uncertainty in physical measurement: WLADYSLAW BLASIAK 290
 Computer simulation of diffraction patterns: N A DODD 294
 News and comment 253, Letters 255, Queries in physics 269, Have you read this? 299, Equipment review 300, Software reviews 301, Book reviews 302, Forthcoming conferences and courses 304
